## Ice storage - Focusun Ice Machine

Focusun is able to provide clients with ice storage in any size and materials.

In addition, the latest PU foam generator enables us to make the most reliable insulation layer from 80mm to 120mm thick. Standard thickness of PU layer is 97mm.

Focusun also offers multiple options for materials using for outer and inner wall. High quality SUS304 and aluminum are totally compliant with the food safety standards. In alternative, we have galvanized steel panel from the most quality supplier to fulfill your needs in the most economical way.

Focusun manufactures three different types of ice storage:

Types	Temperature	Application fields
Common type	+50C~-20C	Fruits, vegetable, flowers, dairy products, wines, chocolate, fresh eggs, meat, medicine, tea leaves, seed, etc.
Refrigerated-type	-10C~-23C	Frozen fish, meat and poultry.
Containerized	-10C~-23C	Fish, meat, rice and flour, ice cream, blood products, chemical raw material, etc.
